

iBAS+ + Admin Task Manual — Overview

iBAS+ + Admin Task Manual

Task-based guide for administrators. Each section is one **job from start to finish** — follow the steps in order. This is not a field reference; it tells you **what to do next** at each stage.

How to use this manual

1. If you are setting up the system for the first time, follow **Module order (greenfield)** below.
2. If you are doing one job only, jump to that module's process.
3. Finish one process completely before starting the next dependent job.
4. After changing a user's access, that user must **log out and log in again** to see new menus.

Default login (after database seed): <http://localhost:3000/login> → admin@ibas.gov.bd / Admin@123456

Module order (greenfield)

When building the system from empty to usable, run modules in this sequence:

Order	Module	Why this order
1	Geography	Needed before user addresses
2	Users	Staff must exist before workflow
3	Books	Rules must exist before questions & syllabus links
4	Questions	Published questions needed for papers
5	Exams	Exam structure before syllabus & papers
6	Syllabus	Maps subjects to books (needs books + exam subject)
7	Papers	Needs exam subject + published questions
8	Workflow	Needs users with workflow roles
9	Audit	Review after go-live

Tools (**PDF to Word**) can be used anytime for drafting content offline.

Quick map: Menu → Module

Sidebar	Module in this manual
Geography	Module 2
Users	Module 3
Book admin / Rule library	Module 4
Regulations	Module 5
New question / Question bank	Module 6
Exam setup / Exam programs	Module 7
Syllabus (from subject)	Module 8
New paper / Practice papers	Module 9
Workflow admin / Guided processes	Module 10
PDF to Word	Module 11
Audit log	Module 12
