

iBAS++ Admin Task Manual — Module 1: Sign-in & dashboard

Module 1 — Sign-in & dashboard

Process 1.1 — Start an admin work session

Start: Browser open, not logged in.

End: You are on the dashboard with admin menus visible.

1. Open the application login page.
2. Sign in with your admin account.
3. Confirm you land on **Dashboard**.
4. Check the left sidebar — you should see **Administration**, **Content admin**, and/or **Workflow admin** sections (depends on your access).
5. If expected menus are missing, stop — complete **Process 3.2** (module access) for your user, then log in again.
