

iBAS+ + Admin Task Manual — Module 3: Users

Module 3 — Users

Menu: Administration → **Users**

Process 3.1 — Onboard a new staff member (full job)

Start: Person is not in the system.

End: Person can log in, see the right menus, and act in workflow if needed.

1. Open **Users** → **Add user**.
2. Create the account and return to the user list.
3. Open the new user from the list.
4. On **Profile** — verify type is correct (admin for data entry staff, officer for process-only staff).
5. On **Workflow roles** — assign roles they will act as (e.g. SDO, DDO) if they use the inbox.
6. On **Module access** — grant **Read** for modules they browse; grant **Create** and **Update** for modules they maintain.
7. On **Addresses** — add at least one address using the division → district → thana picker.
8. Tell the user to log in with the password you set.
9. Ask them to confirm sidebar menus match their job.

Process 3.2 — Give an existing user access to a learning module

Start: User exists but cannot see Books / Questions / Exams / etc.

End: User sees that module after re-login.

1. Open **Users** → select the user.
2. Go to **Module access**.
3. Find the module (e.g. BOOKS) and enable **Read**.
4. If they will enter data, also enable **Create** and **Update**.
5. Save.
6. User logs out and logs in again.

Process 3.3 — Enable someone for workflow inbox

Start: User exists but inbox is empty or hidden.

End: User sees **Action inbox** and receives tasks for their role.

1. Open **Users** → select the user.
2. **Module access** — enable WORKFLOW **Read** (and **Create** if they manage tasks).
3. **Workflow roles** — assign the role code that matches process steps (e.g. DDO).
4. Save.
5. User re-logs in.
6. Verify a published workflow task exists (**Module 10**) and a run is at their step.

Process 3.4 — Deactivate or update a user account

Start: User should no longer work or details changed.

End: Profile updated; inactive users cannot work.

1. Open **Users** → select the user.
 2. **Profile** — change status to inactive if they leave; update names/contact if needed.
 3. **Module access** — revoke grants if they no longer need access.
 4. **Workflow roles** — deactivate roles they no longer hold.
 5. Save.
