

iBAS+ + Admin Task Manual — Module 4: Books (Rule library)

Module 4 — Books (Rule library)

Menu: Content admin → **Book admin** → book detail

Process 4.1 — Create a new rule book from scratch

Start: No book type or book for this title.

End: Book exists with full chapter → topic → sub-topic structure ready for questions.

1. Open **Book admin**.
2. Create a **book type** (category) for this library — e.g. Government Rules.
3. Create the **book** under that type — you are taken to the book page.
4. Click **Edit content**.
5. Add **Chapter 1**, then Chapter 2, and so on until all chapters exist.
6. Select Chapter 1 → add every **topic/rule** for that chapter.
7. Select each topic → add **sub-topics** with the rule text.
8. Repeat steps 6–7 for every chapter.
9. Turn off edit mode and browse the tree — structure should match the printed rule book.
10. Job complete — proceed to **Module 6** (syllabus links) or **Module 5** (questions).

Process 4.2 — Add more content to an existing book

Start: Book shell exists; new chapter or rules to add.

End: New content appears in the tree.

1. Open **Rule library** → open the book.
2. Click **Edit content**.
3. Either add a new **chapter** at the end, or select an existing chapter.
4. Add new **topics** or **sub-topics** as needed.
5. Save each piece before moving to the next.
6. Browse to verify placement.

Process 4.3 — Correct or remove book metadata

Start: Wrong title, type, or duplicate book.

End: Catalog is accurate.

1. Open **Book admin**.
 2. To fix a **book type** — edit or delete from the type list (delete only if no books use it).
 3. To fix a **book** — edit from the book list or delete if the whole book should go.
 4. For deep content fixes, use **Process 4.2** inside the book editor.
