

iBAS+ + Admin Task Manual — Module 6: Questions

Module 6 — Questions

Menu: Content admin → **New question** → question detail

Process 6.1 — Build the question bank for a book

Start: Book structure exists (**Module 4**); no questions yet.

End: Published questions ready for papers.

1. Open **New question**.
2. Create the first question — choose type (MCQ, True/False, etc.), write the stem, link it to the correct book/chapter/rule.
3. For MCQ — add options and mark correct answer(s).
4. Save — you are on the question detail page.
5. Click **Publish**.
6. Repeat steps 1–5 for every question in your bank.
7. Open **Question bank** list — filter or search to confirm published items show up.
8. Done when all needed questions are published.

Process 6.2 — Draft questions first, publish later

Start: Large batch to enter; not ready for learners.

End: Drafts saved; publish when reviewed.

1. Create each question and save (do not publish yet).
2. Review from **Question bank** — open each draft.
3. When approved, open detail → **Publish** one by one (or in batch during review meetings).

Process 6.3 — Update or withdraw a question

Start: Published question has an error or is obsolete.

End: Bank reflects current truth.

1. Open **Question bank** → open the question.
2. Edit content and save, **or** delete if it must leave the bank entirely.

3. If the question is already on a **draft paper**, open that paper and swap or remove it (**Module 9**).
