

iBAS+ + Admin Task Manual — Module 7: Exams

Module 7 — Exams

Menu: Content admin → **Exam setup**

Process 7.1 — Set up a complete exam program (first time)

Start: No department/authority/exam for this program.

End: At least one subject exists and is ready for syllabus.

1. Open **Exam setup**.
2. **Department** tab — create the controlling department (or select existing).
3. **Authority** tab — create the exam authority under that department.
4. **Exam** tab — create the named exam (e.g. SAS 2026).
5. **Part** tab — create exam parts (Part I, Part II, ...).
6. **Type** tab — create exam types (Written, Viva, ...) for that exam.
7. **Subject** tab — create each subject, linking it to the correct part and type.
8. On the last subject, use **Create & open syllabus** to jump straight to **Module 8**, or stay and use the **Overview** panel to verify the tree.
9. Done when every subject you need is listed under the exam.

Process 7.2 — Add a new subject to an existing exam

Start: Exam program exists; new subject added to syllabus.

End: New subject appears in exam tree and has its own syllabus page.

1. Open **Exam setup**.
2. Walk the cascade: select department → authority → exam → part → type.
3. **Subject** tab — create the new subject.
4. **Create & open syllabus** or open syllabus later from **Exam programs** → exam → subject link.
5. Complete **Process 8.1** for that subject.

Process 7.3 — Fix or remove an exam hierarchy item

Start: Wrong name or duplicate at any level.

End: Hierarchy corrected.

1. Open **Exam setup**.

2. Go to the tab for that level (department, authority, exam, part, type, or subject).
 3. Select the item → switch to **Edit** mode → update and save.
 4. To remove — select item → delete (only if nothing downstream depends on it).
